

CNG CONNECT

## Metroplex Fleet Owners Workshop

**May 25th, 2010**  
**TCU Kelly Center**

In 2010, the BIG question will be “Is this the year your fleet switches to the #1 alternative fuel, Compressed Natural Gas?”.

2009 was the biggest year ever for CNG grants and tax incentives and 2010 is shaping up to be another great year. Projects that have never before been possible are now a reality. With the price of oil rising and the price of natural gas at historical lows, interest in CNG is exploding.

To meet the demand for unbiased information, the people at CNG Connect are organizing a comprehensive one day workshop on May 25th to provide public and private fleet managers with answers about the financial impact of adopting CNG. The event is co-hosted by the TCU Energy Institute, the DFW NGV Consortium, the Barnett Shale Energy Education Council, and the DFW Clean Cities and will be held at TCU’s Kelly Center. Additionally, each event features leading speakers from the CNG industry.

To find out more about this event, please register online at [www.cngconnect.org](http://www.cngconnect.org). The website was created to be an online community for fleets that are interested in learning about CNG. You can sign up this workshop in the “Events” tab of the “CNG Connect” section of the site. Or if you would prefer to sign up without joining the site, please email Clint Beauchamp at [clint@zeitenergy.com](mailto:clint@zeitenergy.com).

The events are FREE for fleet personnel and include a catered lunch. Non-fleet registration is \$125. Sponsorship information may be obtained by emailing Clint Beauchamp at [clint@zeitenergy.com](mailto:clint@zeitenergy.com).

The Worksheet and Event Registration can be accessed anytime at [www.CNGConnect.com](http://www.CNGConnect.com)

\$0 for approved fleets registration  
\$125 for general registration

### Highly Interactive Session Focused on Issues Affecting Feasibility:

- Vehicle Options & Replacement Scheduling
- Applying for Grants and Tax Credits
- Estimating Fuel Usage and Station Economics

“Does this save my fleet money”

and

“Benefits of going green”

Fleet Managers learn the key concepts that determine the fleet’s financial outcome of adopting CNG. The Workshop includes a catered lunch with a guest fleet manager speaking on their experience with CNG.

### Feasibility Workshop

In the afternoon it's time to bring it all together with the Feasibility Workshop and a demo of the CNG Connect website.

Participants work in groups with facilitators who can answer questions and provide assistance with the CNG Connect Fleet Feasibility Worksheet.

After the workshop, the CNG Connect staff will analyze each worksheet and display the results on the fleets profile page of the CNG Connect site.

MORNING

# Fleet Feasibility Worksheet

Worksheet Instructions: For each different type of vehicle, please enter the following information: The CNG replacement vehicle that you expect to purchase, the quantity of each vehicle, the expected fuel usage based on the amount of fuel that you are using currently, the number of years you expect to take to replace your existing vehicles with the new vehicles, and the time available to fill the vehicle on site.

	Make & Model	Quantity	Fuel Usage	Vehicle Life	Time to Fill Onsite
Vehicle 1					
Vehicle 2					
Vehicle 3					
Vehicle 4
